

Biel-Bienne, late September 2016

Information

Ladies and gentlemen,
Dear customers and business partners,

Following the departure of Mr. Daniel Affolter (former CEO) from Lecureux SA, the Board of Directors has selected a new executive management.

The responsibilities are now structured as follows:

Gérard Jeanfavre	Technical Director	R & D
Hubert Rawyler	Commercial Director	Sales
Fabien Amato	Member of Management	Sales automation and turn-key projects
Alessandro Celi	Member of Management	Sales automation and screwdriver products
Priska Jorio	Member of Management	Finance & HR
Thomas Villard	Member of Management	Production
Jacob Wyss	Member of Management	R & D

In order to ensure the successful continuity of the company, to become an even more important and effective player in our industry and to better serve our customers, Lecureux SA and Femto SA will be merged, effective January 1st 2017.

We are convinced that pooling of the respective competencies of the two companies will provide you better products and services, and thus set the base for a brighter future.

Femto will represent the « measurement devices » product line in the catalog of Lecureux SA; further development and maintenance of Femto products is guaranteed and new products are in the pipeline. All Lecureux SA products and services will continue as before.

For Covatec and Femto products, your contacts will remain as in the past:

Covatec	Thomas Villard
Femto	Jacob Wyss / Gérard Jeanfavre

We will try to minimize the impact of both restructuring and merger onto the daily business and thank you in advance for your understanding, should there still be some kind of negative fallout. Everything is planned to be completed within 6 month.

Please feel free to contact us with any questions.

Sincerely,

Commercial Director

Hubert Rawyler

Chairman of the Board

Moritz Messer

Technical Director

Gérard Jeanfavre
